

# MOBILE VARIABLE MESSAGE SIGNS

Vehicle Hire and Management

All the signs are solar powered and have remote programming and remote diagnostics. Signs are able to be kept on site for more than 2 years without the need of a mains charge.

## HIGH SPEED SIGNS

High speed signs have the correct character height for high speed roads and will display up to 12 characters and 3 lines of text and are fully compliant with Highway Agency specification

## LOW SPEED SIGNS

The low speed signs can do 17 characters and 5 lines of text, these signs have been designed for tight spaces as they easily fit onto a 4x4foot barrier, these signs are used in cities and were widely used during the 2012 London Olympics.

These signs are expected to run continuously so are monitored remotely, if battery change is needed we do this free of charge. If a message needs changing on the sign we can do this remotely again free of charge.

## FEATURES

- Solar Powered
- Solar- Tilt/Rotate
- Green Energy
- Portable
- Plug and Play
- Password protected
- NTCIP Compliant
- Full Matrix
- 100 brightness levels
- Unique LEDs
- Auto font remote
- Built to last
- 3G Modem

## BENIFITS

- No Running costs, No engine maintenance, No noise , No pollution
- 40% more efficient use of light
